- **Suyash Hospital-Seawoods** brings in highly experienced & talented team of senior Consultants & Doctors and a full team of Paramedical staff and excellent working environment that ensures the availability and access to the best medical talent round-

the-clock.

Problem:

- Lack of immediate retrievals: -Hospital information is very difficult to retrieve for example to locate the patient's history; the user has to go through various registers. This results in inconvenience and wastage of time
- Lack of prompt updating: - Various changes of information like patient details or immunization details of child are difficult to make as paper work is involved.
- Error prone manual calculation: - Manual calculations are error prone and time consuming which may also result in incorrect information. For example calculation of patient's bill based on various treatments
- Preparation of accurate and prompt reports: - This becomes a difficult task as information is difficult to collect from various registers

Solution:

- With the installation of RxOffice® HMS Software the data is retrieved with a single click
- All the data is stored quickly at a central server which makes it easier and faster to access.
- Even the immunization data can be updated as well as the software can give the immunization reminders to the hospital.
- RxOffice® HMS software is swift and accurate billing is done for all the given services

Results:

- Saves time for the hospital administrators
