

ITShastra Experiences Significant Growth Through First Quarter 2011

MUMBAI, India, May 24, 2011 – ITShastra, a software development, testing and design company for worldwide business needs and offshore project delivery, today announced that during the first quarter of 2011 it added four new clients, successfully completed 16 projects for existing clients globally and opened a fully-staffed new location in Pune.

ITShastra provides quality software project services at significantly lower costs to organizations across any vertical. Its four newest clients, who touch the mortgage, education and construction industries, enlisted ITShastra for software and Web development services. Additionally, ITShastra's migration experts transferred a new client's Web site from one hosting server to another, closely studying the site's technicalities to smoothly transition the company's database and emails without any interruption to service.

The first quarter also saw ITShastra completing customized Web sites, meeting the unique business objectives of clients spanning restaurants, banks, driving schools and also creating a Web site for children with special needs, among others. Many sites were developed in PHP and were designed for maximum search engine optimization (SEO). Other features include integrated news, galleries, blogs and videos, as well as expandable sections and resizable backgrounds. Web sites developed by ITShastra offer clients enhanced functionality, such as improved search capabilities, the ability to present and save online forms and the technology to facilitate online registrations.

"ITShastra combines expert technology skills with a deep business understanding to offer a broad range of services," said Prasad Nagool, CEO of ITShastra. "Our clients can always depend on transparent, controlled project monitoring, as well as reduced expenses. We look forward to working with the partners we gained in the first quarter of this year and expect continued growth through the rest of 2011 and beyond as we double our development staff and resources at all locations, including the newly opened Pune branch. ITShastra aligns our growth plan with the needs of our clients looking to improve their technology and achieve a competitive edge."

ITShastra, a premier software service and design company, produces leading-edge solutions, products and designs for businesses worldwide. The company specializes in cost effective offshore product delivery and enables its clients to maintain ultimate control over their development resources.
